About Advanced Bedding

We are excited to offer a full line of bedding products to the RV, Camper, Trailer world! Our 35 years of experience in the bedding industry has given us a tight focus on:

- Excellent customer service
- Free shipping
- USA made products with reliable craftsmanship

If you don't see a product or size that you want, please call us. Not all products and sizes are listed in this catalog. We also carry bedding for conventional, adjustable, hospital, round and dorm beds.

Fabric Information

<p>200 Thread Count</p> <p>Our 200 Thread-Count Poly Cotton is the most durable and economic fabric that we offer. These strong 50% Polyester and 50% Cotton fibers resist wrinkling, and do not shrink even in hot water. While they are not as soft as cotton, they can be expected to last longer and offer a great value.</p>	<p>300 Thread Count</p> <p>Our 300 Thread-Count 100% Cotton is the lowest thread count we offer in 100% Pima cotton, and therefore the most durable. The fabric has a sateen weave, for a soft and supple feel and good breathability, but does not have the slick lustrous finish of the T-600 fabric.</p>
<p>400 Thread Count</p> <p>Our 400 Thread-Count 100% Prima Cotton is soft and breathable. Compared to higher Thread-Count fabrics, the 400 Thread-Count is lighter weight and more durable.</p>	<p>600 Thread Count</p> <p>Our 600 Thread-Count Fabrics have a very dense weave, and a pronounced sateen finish. They are treated with a micro silicone to be wrinkle resistant. As thread-counts go up, the material becomes softer, finer, and more delicate.</p>
<p>Flannel Cotton</p> <p>Our flannels are imported from Portugal, and are woven from 100% Pima Cotton.</p> <p>Flannel is graded by weight per square yard, and our flannel tips the scales at 4.3 oz.</p>	<p>Organic Cotton</p> <p>Certified Organic Cotton has been grown, harvested, and processed according to Earth-friendly standards. People with allergies and chemical sensitivity especially benefit from this fabric, as conventional cotton may retain harmful toxic residues. Even if you don't have sensitive skin, organic cotton will feel better against your skin.</p>
<p>Bamboo Fabric</p> <p>Earth-Friendly and bio-degradable, bamboo is a spun from the fibers of the bamboo plant. It wicks away moisture at an incredible rate. Up to nine times as fast as cotton! This means that your sheets won't get clammy as you perspire in your sleep, making these the coolest-sleeping sheets around. Bamboo fibers naturally inhibit the growth of bacteria and fungi.</p>
